

Registration starts at 8:30 a.m. and the program runs from 9 a.m. to 12:45 p.m.

Each student will attend a morning session focused on college resources and summer internship opportunities and then choose to attend in two workshops. The half-day program concludes with a Resource Fair featuring over 30 booths and interactive displays, all focused on careers and opportunities in the healthcare field.

Here is a list of our workshop offerings:

A Physician's Perspective in Navigating a Career in Health

Learn what it takes to thrive as a professional in primary health care. This session provides essential knowledge for anyone considering becoming a doctor and physician. Whether you are committed to applying to medical school or are simply exploring the path to becoming a physician, this session will equip you with the essential knowledge needed to not just practice, but to thrive and lead in primary health care.

Discover a World of Opportunities in Mental Health

Mental health offers a diverse range of career paths, each with its unique focus and responsibilities. Learn how their work is making a positive impact on people's lives and why mental health is a vital component of overall well-being, alongside physical and emotional health.

Discover Midwifery: A Career in Holistic Maternal Healthcare

Curious about a career in maternal health? Midwives are certified medical professionals who offer holistic, family-centered care during pregnancy, birth, and postpartum. Come learn how centering pregnancy from Pre Natal care to childbirth with medical supports women in labor and delivery

Career Technical Education and Opportunities for Health Care Jobs

Geared for high school students and adults considering job opportunities in healthcare jobs that may require certifications, technical skills, work-based learning and more.

Essential Jobs in Healthcare: Respiratory Therapists, Patient Care Technicians, and Specialty Techs

Patient care technicians are entry-level healthcare workers who provide direct patient care under the supervision of registered nurses or other licensed professionals. Specialty techs assist surgeons during operation and prepare instruments, equipment, and the patient for surgery.
Interactive Displays.

The Power of Pictures in Health Care-Imaging, Radiology, and Xray

Discover how cutting-edge technology is used to gather vital patient data, empowering physicians to make accurate diagnoses.

KP Launch

Review of KP LAUNCH opportunities for a summer pain internship within a Kaiser Hospital System and student Q and A.

You Look Like a Surgeon

Exploring what does it mean to be a Surgeon. Learn more about the ins and outs of the health care system of care for patients from the viewpoint of a surgeon

Building Health Care Facilities of the Future

Learn what it takes to build a Hospital Facility, with a state-of-the-art 303-bed hospital. The project, set to open around 2029, includes a healing garden, private patient rooms and improved parking. It will be Kaiser Permanente's first all-electric hospital, reflecting a commitment to high-quality care and sustainability, and ensuring compliance with new seismic standards.

Behind the counter in Pharmacy

Careers within the pharmacy health field and the necessary training required. Most of these jobs are highly transferrable and can be found in hospitals, clinics, drug stores and beyond.

A Career in Physical Therapy: From Injury to Recovery, it is more than just Rehab

While athletic trainers often take the lead in providing immediate care on the sidelines during games like Friday Night Football, physical therapists play a crucial role in long-term rehabilitation and injury prevention.

Childhood Health-Beyond the Check Up- A Journey from Cradle to Campus

A deep-dive exploration into the dynamic world of pediatric health, viewing the child's journey from birth through adolescence as a seamless continuum of care.

Robotics in Surgery and Health Care

Innovative science is creating ways to use Robotics for accessing research based minimally invasive care for patients. See how robotics is used in health care and is improving patient care

The Science of Communication: Exploring Speech and Language Careers

Join us for an exciting workshop that goes "beyond the words" to explore the fascinating fields of Speech-Language Pathology (SLP) and Audiology. If you love science, helping others, and solving complex problems, this session will show you a rewarding and diverse career where you become a vital link in the chain of human communication.
